

Message from the CNES

It has been a great pleasure for CNES representatives and all the French companies to take part in the Satforum 08 event and meet Greek public authorities and industries.

Congratulations to the organisers, the Ministry of Transport and Communication and the French Embassy in Athens for such a nice and well organised event and great thanks for the warm welcome.

A lot of very fruitful discussions took place during these two days in the Ministry in Athens between all participants in a very nice and effective atmosphere.

We are looking forward for the future promising cooperation between Greek and French public and private entities.

Satforum 08 was really a great success.

We hope to see you all in Toulouse end of April for the "Toulouse Space Show".

With very best regards,

Bernard Mathieu
CNES – Paris

Greek entities are welcome in the Toulouse Space Show

It is our pleasure to inform you about the opening of the website of the International week on space applications

« Toulouse Space Show »

www.toulouspaceshow.eu

which will be held in Toulouse (France) from the 22nd to the 25th April 2008.

Toulouse will host in the Pierre Baudis Convention Center the most important actors in the world's aerospace industry, particularly in space applications. An opportunity to meet with more than 1,000 experts, service providers, clients, users, researchers and students from all over the world.

3 international conferences will be organized during the week:

- **SPACE APPLI**: Space applications days
- **ENC-GNSS**: European navigation conference
- **EFTF**: European forum for time and frequency

And a very important exhibition (EXPO) on the theme of Space applications.

You are invited to submit your abstracts as soon as possible.

Website contains current information and will be regularly updated (conferences, exhibition, sponsoring, hotel reservation, travel). Do not hesitate to get information.

Secure this date in your diary now.

We hope to welcome you in Toulouse
Yours faithfully
