<b>PROPOSED COOPERATION (Describe in few words):</b>	
<p>MEDES has developed several projects in telemedicine and epidemiological surveillance, and is interested in partnership with end users to deploy these solutions ( ie crisis management, maritime medicine,.. The technology used to implement these services is based on a software editor tool, which enable to generate the deployed applications ( on smart phone,s PCs or as web applications ) from the simple data model. MEDES is ready to partner to develop mobile applications , especially in the health sector, or to license the tool to application developers. Finally, MEDES is willing to join projects which offer global crisis management solutions;</p>	
<b>REQUESTED PARTNER (Describe Partners Characteristics):</b>	
End users of telemedicine or epidemiological surveillance	
Customers of mobile applications, mainly in the health sector.	
Global operators of crisis management
