[1] Please indicate for which program (eg. ARTES 1,3,4) and indicate EMITS reference as applicable.

[2] Please indicate interest for a specific national call in GR or FR e.g. in the area of Transport, Telecoms, Defense etc.

[3] Please define type and provide details: it may be in the frame of other, existing cooperation schemes, PPP, etc.

**PROPOSED COOPERATION:**

*Design and implementation of an intelligent EGNOS application for consumer assistance in certain shopping areas. The application belongs to the general category of location based services in mobile networks, and aims at combining the advantages of traditional shopping and e-shopping. Satellite information is used for location and navigation purposes, while mobile/wireless networks (GPRS/UMTS/WiFi) are used for data transfer between the involved entities. More information and a detailed project description can be given to interested potential partners.*

*Duration: 2 months study/ 4 months design/ 8 months implementation / 4 months pilot & evaluation*

**REQUESTED PARTNERS:**

*Mobile Operator*

*SME specialized on mobile applications*

*User (consumers union)*

*Commercial association*
